Exposures:

Step A: Potential dermal in handling bottle. Expect workers will use protective gloves and clothing depending on the actual handling methods.

Step B: No exposure expected.

Step C: Potential dermal in handling any excess material and in cleaning equipment. Expect workers will use protective gloves and clothing.

Releases:

Release Point 1: Empty containers can be recycled. SDS contains instructions that empty containers should not be rinsed to sewers and that they should be incinerated at time of disposal. Waste material likewise should be incinerated and not released to the environment.

Release Point 1: Cleaning materials also expected to be disposed of by incineration. Cleaning solvents will most likely be flammable waste.
